DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 are, drawn to buffering received packets of data and determining based on the header within the data packet a next process to process the data packet, classified in class 710, subclass 52.
 - II. Claims 12-14 are, drawn to an addressing network that interconnects a plurality of special purpose processor and the special purpose processor processes packet of data in a predetermined order, classified in class 709, subclass 200.
 - III. Claims 15-21 are, drawn to processing received data packets to provide for each data packet a header including a list of processes to perform on the data packet, classified in class 709, subclass 102.
 - IV. Claims 22-27 are, drawn to a processing element for receiving data and for formatting the data with a list of processes selected from available processes and a routing memory for providing data to processors, classified in class 709, subclass 105.
 - V. Claims 28-46 are, drawn to a data encryption system comprising a control process which modifies a received packet and an interconnection which responds to control data in the packet, classified in class 710, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2182

2. Inventions **I, II, III, IV** and **V** are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). The invention **I** deals with buffering received data. The invention **II** deals with an addressing network that interconnects plurality of processors. The invention **III** deals with modifying a packet head to include a list of processes to be performed. The invention **IV** deals with a routing memory for providing data to processors. The invention **V** deals with a data encryption system, which modifies incoming data.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group five is not required for Group one, two, three and four, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2182

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niketa I. Patel whose telephone number is (703) 305 4893. The examiner can normally be reached on M-F 9:00 A.M. to 5:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey A. Gaffin can be reached on (703) 308 3301. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 746 7239 for regular communications and (703) 746 7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305 3900.
